Veritas Alta Capture Microsoft Bundle

Capture and archive Microsoft communications, including Yammer, SharePoint Online, Teams, and OneDrive.

Empower Compliant Teamwork and Collaboration Across Your Microsoft Applications

The Veritas Alta™ Capture (formerly known as Merge1 SaaS), Microsoft Bundle helps companies easily archive communications for compliance and eDiscovery, including those via SharePoint, Microsoft Teams, OneDrive, and Yammer.

As the world's most popular collaboration, content management, and content sharing platform, Microsoft 365 applications provide more convenience and productivity for the workforce than any other technology available today. With the growing set of content stored and shared on Microsoft 365 applications, the regulatory mandates for mediums such as Microsoft Teams, SharePoint, Yammer, and others have also increased.

Veritas Alta Capture's advanced compliance and robust capture solution can save your company a substantial amount of time and money. This powerful tool does not need any supervision and will continuously archive communications taking place over all applications. Veritas Alta Capture gives you the capability to tag individual documents or keywords to enhance future search results. What may have taken weeks or months in the past can be significantly condensed.

While other products and services claim to offer similar functionality, Veritas Alta Capture stands alone as the most mature and proven solution for the ingestion of multiple message types. Veritas Alta Capture offers the flexibility of user-defined templates and rules, with the ability to import the data into an end-to-end unified cloud data management platform.

Yammer

Communications taking place via Yammer can easily be archived when adding Veritas Alta Capture to Veritas Alta™ Archiving. As opposed to other archiving compliance solutions, which require sending your workforce's critical sensitive communications to a third-party data store, Veritas Alta Capture retains Yammer communications and stores them directly in Veritas Alta Archiving, ready for discovery, supervision, and classification.

OneDrive

Whether you need to archive and centralize your cloud-based files for compliance, eDiscovery, or information governance, Veritas Alta Capture facilitates the archiving of your OneDrive for Business files and documents.

Microsoft Teams

Communications taking place via Microsoft Teams can easily be archived when adding Veritas Alta Capture to Veritas Alta Archiving. Chat threads are presented in Native and Collaboration view with reactions, emojis, and modern attachments for link shares.

SharePoint

Add Veritas Alta Capture to extract any files that have been integrated into SharePoint through collaboration. You can now archive any replies, blog posts, likes, comments, and documents within your SharePoint communications for compliance and eDiscovery needs.

Helps Comply with Major Regulatory Bodies

- Financial: SEC, FINRA, CFTC, SOX, MiFID II
