Professional Services
Enterprise Vault Deployment Service.

Accelerate Success With Enterprise Vault Deployment Services

The Enterprise Vault Deployment Service from Veritas provides flexible implementation of production Enterprise Vault™ servers and application integrations. Our professionals manage all phases of planning and delivery to help speed time to service, lessen deployment burdens and concerns and improve new feature and function knowledge and competency.
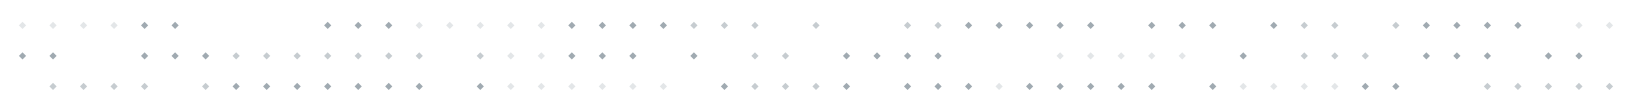

Service Benefits

- Reduce the effort required to install and configure your Enterprise Vault environment
- Lower deployment risks and shorten time to success
- Improve Enterprise Vault knowledge with demonstrations and opportunities for hands-on experiences

The Enterprise Vault Deployment Service offerings are divided into Base and Add-On options. The Base deployment service helps crystalize a coordinated plan and deployment schedule. Enterprise Vault Add-On deployment services facilitate rapid installation and integration of your selected features.

Enterprise Vault Deployment Service	Description
Enterprise Vault Deployment Base	- Pre-Project Planning: Initiation, kick-off meeting and schedule planning - Post-Project: Project review and closeout
Enterprise Vault Add-On	- Design: Define requirements and configuration parameters for each Enterprise Vault Deployment Add-On service purchased - Implement: Perform deployment steps for each Enterprise Vault Deployment Add-On purchased

Service Specifications

The Enterprise Vault Deployment Service Base and Add-On options provide effective customization aligned to your business needs. Add-Ons help ensure the appropriate Enterprise Vault components are installed, configured and tested in your IT environment. You can find detailed service specifications in the Enterprise Vault Deployment Service Description document.

Each Enterprise Vault Deployment Service order must include a single Base and one or more Add-On options.
