

NetBackup IT Analytics for Enterprise

Get actionable insights through a single-pane-of-glass.

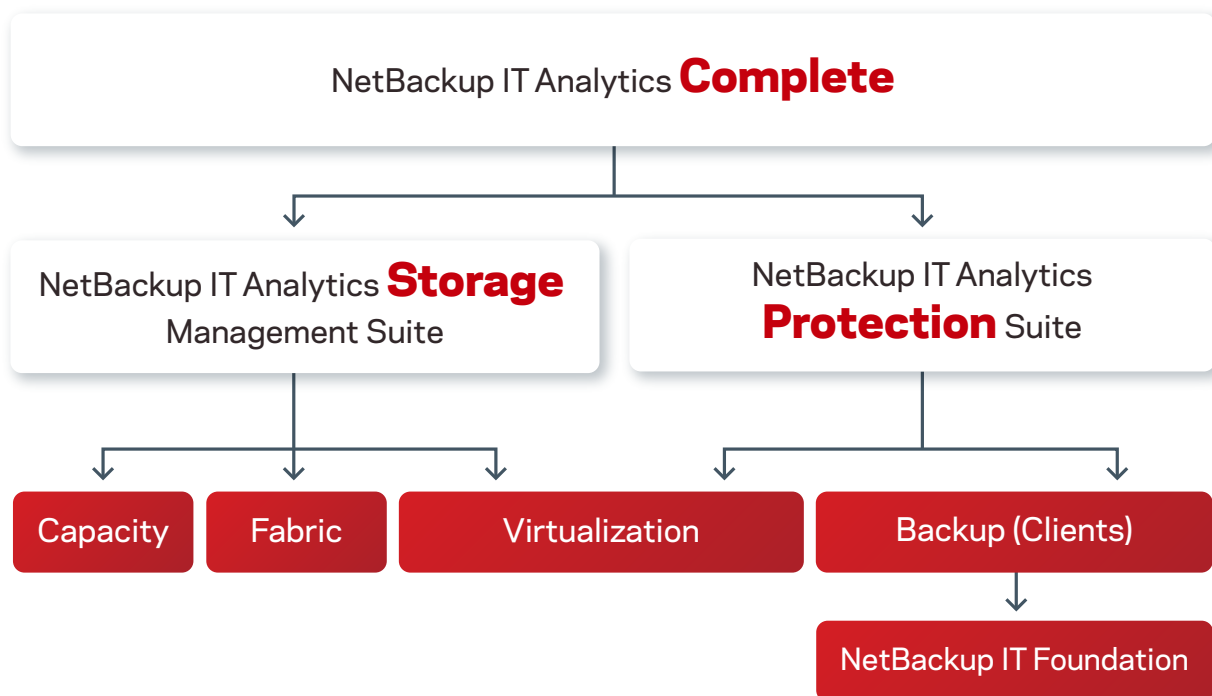

Overview

NetBackup™ IT Analytics is the industry's only vendor-agnostic IT analytics platform. Its single-pane-of-glass view provides deep analytics and interconnected insights across the critical components of your IT world, whether on-prem or in the cloud. Simply enable products within the unified platform—as you need them.

NetBackup IT Analytics Foundation is feature set supporting NetBackup 10 or higher, NetBackup Appliance, & Backup Exec. It includes reporting, alerting dashboards, and NetBackup configuration & restores via WebUI access. For customers requiring more advanced analytics across heterogeneous vendors, they can choose from these simple, predictable, and comprehensive NetBackup IT Analytics offerings:

- **Protection Suite**—Includes the Virtualization and Backup solutions
- **Storage Management Suite**—Includes the Capacity, Fabric, and Virtualization solutions
- **Complete Suite**—Includes the Storage Management and Protection Suites

NetBackup IT Analytics provides a software development kit (SDK) for users to quickly create data connectors for any sub-system (Backup, Storage, Cloud) not listed in this document. For more information, please contact a Veritas sales representative.
