

The Veritas Learning Lab

Veritas Education Datasheet

Overview

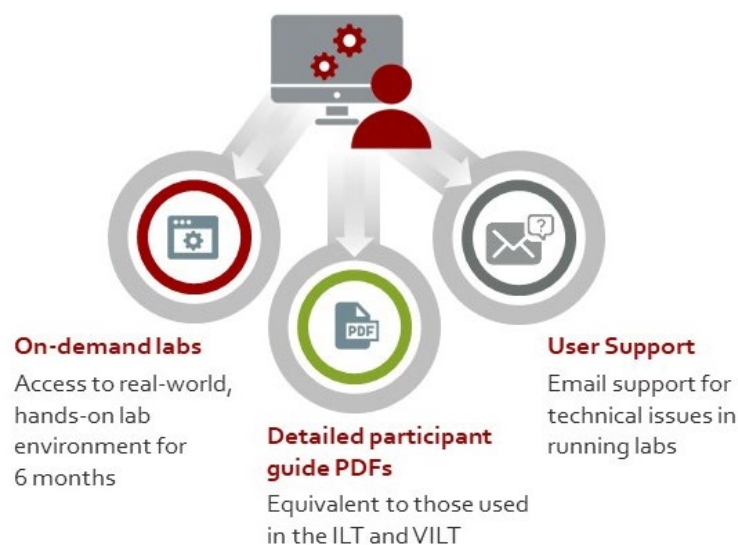

Everyone has their own preferred method of learning new skills and technologies. Some people prefer attending formal training classes. Others prefer reading documentation or watching videos. Some people like to simply get their hands on a product and learn by doing. The Veritas Learning Lab is for those learners who want to skip the formal lectures and simply learn by doing.

Here's How It Works

The Veritas Learning Lab platform gives you access to a set of real-world, hands-on lab activities on the product of your choice. These lab activities were developed by Veritas product experts and are the same lab activities that you would receive in a formal training class. The lab activities provide guided, step-by-step instructions and are modularized so that you can focus on the activities that are most important to you. You receive six months of access time to the Veritas Learning Lab of your choice. This means that you can work through the lab activities on your own time, around your busy schedule, and the labs are accessible from anywhere that you have an internet connection.

Key Features of the Veritas Learning Lab

- The Veritas Learning Lab is a **self-guided, lab-centric** training offering that motivates students to "learn by doing".
- Students receive **6-month access** to the same lab environment, activities, and participant guide PDFs as equivalent ILT/VILT classes, minus the scheduled instructor lectures.
- Access can **begin immediately** upon registration; no waiting for the right class to be available at the right time in the right region.
- **User support** is available via email for technical issues in running the labs.
- Students can work through the lab activities and PDF guide **on their own time, at their own pace**, over the 6-month access period.
- Select courses contain high-resource labs. Students acquire 6 months access to the labs but must request [re-access](#) in 7-day increments.
